Next Meeting is Monday, June 14

The next meeting will be Monday, June 14, 7:15 p.m., at the A. J. Palumbo Hall at Carlow College, 3333 Fifth Avenue, Pittsburgh, PA (Oakland). As you approach the campus on Fifth Avenue (heading toward downtown Pittsburgh), do not turn right into the Carlow Campus entrance. Instead, pass the entrance, stay in the right lane, and make the immediate right into the parking area. Park here and cross the street. Place a note on your dashboard saying “Botanical Society Meeting,” or use your parking permit.

Eric Burkhart will present “American Ginseng in Pennsylvania: Culture, Context, Conservation.” Eric will share from his research into the cultural and ecological context of ginseng occurrence in the Commonwealth. Included will be an introduction to ginseng biology, with emphasis on those aspects that pertain to husbandry. American ginseng (Panax quinquefolius) is a historical component of our native regional flora, and it continues to furnish an important trade commodity. Any contemporary concern over collection practice must appreciate the human context that continues to shape ginseng occurrence. Eric is a botanist, horticulturalist, and agroforester.

If you missed the Xocolatl…

At her “Xocolatl: The Natural History of Chocolate” presentation, Mel Melan told how the Maya fermented and roasted cacao beans, and ground them with mano and metate. This was mixed with hot water, chili, cinnamon, corn meal and poured from cup to cup to create foam. The Aztecs prepared their chocolate in a similar manner, but also added vanilla beans, black pepper, honey, flowers, and achiote (annatto).

For those who missed the tasting, here is Mel’s recipe for Cinnamon-Chili Truffles.

Cinnamon-Chili Truffles (adapted from a recipe posted to the Chile-Heads Digest)

2/3 cup whipping cream
1 TBSP ground cinnamon
1 TBSP ground chili pepper*
12 oz bag semi-sweet chocolate chips
cocoa powder

* Use pure ground chili pepper, not chili powder that may contain cumin, oregano and salt. Mel suggests a mixture of ground ancho (mild) and cayenne (hot) pepper. Adjust the mixture to achieve the degree of hotness you desire.

Mix the cream, cinnamon and chili pepper in a medium saucepan. Heat the mixture over low heat until simmering at the edges and until the spices are evenly mixed in. Add the chocolate chips and stir until the chocolate is melted and all the cream is incorporated. Refrigerate the mixture in the saucepan for at least 2 hours. Roll rounded teaspoonfuls of the chocolate into balls and coat with cocoa powder. Alternatively, while the mixture is still hot, spread onto a cookie sheet. Refrigerate for 2 hours, cut into bite-size pieces and coat with cocoa.

Eagle Project Is Completed

I am David Machesney from Boy Scout Troop 368 in Perrysville, PA. I wanted to write to thank you again for your support and to report that I have completed my Eagle project which your group so generously helped fund.
I started the project in the fall by talking to North Park Naturalist, Meg Scanlon. She requested a deer exclosure on the Latodami Nature Trail on Brown’s Road in the park. After surveying several sites, I decided on a level area on the west side of the trail because it had a small water seep area, it was partly shady and it didn’t have too many barberry bushes to remove. I spent the next few months raising funds for the materials for the 40X40 foot, 7.5 foot high exclosure. The fencing is a high-strength black polypropylene mesh that is guaranteed to keep deer out.

On November 22, which happened to be my birthday, members of my troop, some of their dads, my parents and my Uncle Bob all helped dig sixteen 30” holes for the posts and the next day we attached the fencing.

Finally Spring arrived and we were able to reintroduce some native wildflowers to the site. I erected a sign explaining what a deer exclosure is, with laminated color photos (thanks mom) of the wildflowers that we planted, so that visitors could try to find them. I hope you have a chance to visit my project.

Some of the plants introduced to the exclosure were donated by Esther Allen and include Blue Violet, Trout Lily, Wild Blue Phlox, Dutchman’s Breeches, Virginia Bluebells, and Jack-in-the-Pulpit. Also introduced were Ginseng seeds from Ed Divers and Green Dragon corms from Phyllis Monk. Plants already there include Skunk Cabbage, Round-Lobed Hepatica, and Mayapple.

**Directions to Latadomi Nature Center**
Exit Rte. 79 at Cranberry. Go South on Rte. 19 through Wexford to a red light at Ingomar Road. Make a left onto Ingomar. Pass the batting cages, make a left at the light onto Kummer Rd. You are now in the Park. Follow this road past the golf course and past the ice skating rink. Turn left onto Brown Road. The Nature Trail parking lot is on the left.
